## About Me

I'm a 3rd-year Computer Engineering student at Dokuz Eylül University. I love game development/design and developing apps to solve annoying problems. I force myself to create new challenges everyday with multiple projects that I enjoy and adore. I work well with new technologies if I the future projects that could be made via using them.

# EMRE UÇMAZ

## Game/App Developer

### Education

**Computer Engineering  
Bachelor's Degree**  
Dokuz Eylül University  
2023-2027

### Expertise

Game Design/Development  
Full Stack Developing  
Unity  
Leadership (Chairman - POG)

### Language

Turkish - Native  
English - C1  
Arabic - B1

## Projects

Oct 2024  
-  
March  
2026

### TÜBİTAK, "Düşüncelerini Hafiflet!"

Solo Game Design/Development

- Conducted a research project (With Dr. Sıla Derin) combining psychology and technology, utilizing programming to model behavior and analyze patterns. Showcased analytical and problem-solving skills. Earned right to get a scholarship from TÜBİTAK. Continuous updates and revises going on until March 2026.

Nov  
2024

### DEUPOG - Jamination7

Lead Developer/Designer (Team of 2)

- A stealth-action game developed during a Game Jam within only 48 hours. Players experience the thrill of sneaking, strategizing, and making daring escapes. Highlights my skills in Unity, level design, and creating easily playable gameplay. This game is also my first ever game I ever tried and finished.

July 2025  
-  
Ongoing

### UniHub - A Social Platform for University Communities

Full Stack Development

- Solo development of the whole stack and also marketing.
- Growing business
- www.unihub.tr

September  
2025

### IZOTOP - Game Jam

Lead Developer (Another team of 2)

- Developed in 30 hours with a teammate, this Unity project is a rogue-lite local co-op game featuring fun mechanics and random events. Showcases rapid prototyping, teamwork, and creative design under tight time limits.
