EXPERIENCE & PROJECTS

TÜBİTAK, "Düşüncelerini Hafiflet!" <i>Solo Game Developer/Designer</i> Conducted a research project (With Dr. Sıla Derin) combining psychology and technology, utilizing programming to model behavior and analyze patterns. Showcased analytical and problem-solving skills. Earned right to get a scholarship from TÜBİTAK. Continuous updates and revises going on until March 2026. Used Unity 2022 for development and Firebase implementation for data exporting.	March 2025 - Now
DEUPOG - Jamination7 (Game Jam) <i>Lead Game Developer/Designer - Team of Two</i> A 2D Pixel Art stealth-action game developed during a GameJam within only 48 hours. I used Unity 2022 for developing the game and Git for version control. Managed to finish the project in 48 hours as a first time Jammer.	10 May 2024 - 13 May 2024
Dokuz Eylul University <i>Hardware Intern</i> I completed my 4-week hardware internship together with two colleagues under the supervision of Dr. Feriştah Dalkılıç. The resulting project was highly successful. Smart Flower Pot: A smart pot that measures the soil moisture, checks whether its internal water level is sufficient, and automatically irrigates the soil when the necessary conditions are met and watering is required. In addition, a mobile application was developed through which the soil moisture level and the water level can be monitored. From circuit design and PCB fabrication to software development, every stage of the project was carried out entirely by our team through hands-on work.	August 2025 - September 2025
