Full-Stack Software Engineer — Java / Spring Boot · Expo Framework · SQL · C# / .NET

SUMMARY

Computer Engineering student at Dokuz Eylül University (graduating May 2027) and founder of **UniHub**, a campus platform with **1,000+ users** on iOS and Android. I build full-stack products end to end, from Spring Boot backends to Expo mobile apps, and work with an **AI-driven SDLC**.

EDUCATION

Dokuz Eylul University October 2023 - May 2027

Bachelor's Degree - Computer Engineering

Expected May 2027

Degree thesis: Reach Engine, a C++20 game engine (see Experience & Projects).

University American College Skopje September 2024 - February 2025

ERASMUS+ Exchange Computer Science

1 Semester

EXPERIENCE & PROJECTS

Founder & Lead Full Stack Engineer – UniHub June 2025 - Present

Full Stack Development - Owner · unihub.tr · App Store · Google Play

Social platform for verified university students: club discovery, event registration, QR tickets and an auto-generated activity portfolio. **1,000+ users**, **50+ communities**, **5+ universities**.

Solo founder and engineer; now planning a **business expansion** and recruiting a co-founder and a marketing manager.

Backend: Java 21 + Spring Boot 3.5 REST API serving mobile, web and third-party partner sites; Spring Security with a Firebase JWT filter and an API-key filter for partners; 26 JPA entities on PostgreSQL; OpenAPI/Swagger docs; PDF reports with OpenPDF; 230 automated tests; ~540 commits.
Mobile: React Native 0.81 + Expo SDK 54 app (v2.0) with .edu.tr email verification, QR ticketing and a manager-side scanner with a 24-hour check-in window, push notifications, admin approval workflows, CSV exports, TR/EN localization and dark mode.
Web: React 18 + TypeScript + Vite client with TanStack Query, Tailwind/shadcn and i18next, deployed on Vercel.
Community SDK: TypeScript npm package that lets clubs connect their own websites to UniHub, with origin-bound publishable keys, built-in request pacing for the server's rate limit and TR/EN errors; unit and contract tests in Vitest.
Infrastructure: self-managed VPS behind Nginx, Docker, GitHub Actions deploy pipeline.

Nissth September 2026 - Present

Creator · github.com/uKmaz/Nissth

File-based framework that makes AI coding agents (Claude Code) operate deterministically instead of re-exploring a codebase each session.

Persistent state in an append-only status ledger, a pre-computed knowledge layer and a plan → execute → verify → report loop.
Diagnostic Bridge bindings for Spring Boot, Expo and PostgreSQL behind one dispatcher, plus five Node.js repo checks (bootstrap and drift, manifest validation, freshness, plan linting).
Verified suites: 104 Spring Boot unit tests, 80 Expo tests, 107 PostgreSQL tests.
Runs the development of my current projects, including UniHub, PostPilot and the finance app.

Butik – E-commerce Template August 2026 - Present
Developer

Reusable single-shop e-commerce platform for Turkish retailers: one codebase, one deploy per shop. Running live for a clothing boutique.

Stack: Next.js 15 + TypeScript on Cloudflare Workers (OpenNext), Supabase/PostgreSQL.
Checkout: PayTR iFrame checkout with refunds; stock held during payment and released on expiry; guest and account checkout; returns.
Admin panel: colour × size variant grid, per-colour photos, stock sync from the shop's till export (.xlsx), campaigns and reports.
SEO and AI discoverability: JSON-LD, Google Merchant feed, sitemap and llms.txt generated from config.
Tooling: CLI to spin up a new shop and a go-live preflight check.

Barber SaaS – Appointment Platform (In Development) July 2026 - Present · on hold
Developer

Multi-tenant booking SaaS for barbershops: Next.js 16, Prisma, PostgreSQL, NextAuth. Owner and staff roles, one-time onboarding codes that bootstrap a whole shop, Standard/Pro plans, commission settings, audit log and web-push reminders; preview deployed on Vercel.

PostPilot – Desktop Planner September 2026
Developer

Offline-first Windows widget for planning social-media posts across several game projects. C# / .NET 10, WPF, MVVM, SQLite. Four versions shipped to 2.1.2 with 442 automated tests and UI Automation test drills.

Süprüz (formerly EcoBite) November 2025 - June 2026 · closed
Co-Founder - Full Stack Software Engineer (Team of 5)

Location-based food-rescue marketplace connecting consumers with local businesses to cut surplus food waste.

Finalist, YGY entrepreneurship competition at Galatasaray University, out of 150+ teams.
Designed a Dockerized modular-monolith backend (Java/Spring Boot) and a 1 km proximity reservation engine on PostgreSQL + PostGIS, with pessimistic locking for flash-reservation spikes and encrypted QR check-out.
Built the pre-launch waitlist site: Next.js 16, TypeScript, Tailwind v4, Zod.
Wound down in June 2026 as the team moved on to their own careers.

Reach Engine – Degree Thesis September 2026 - Present
Co-Developer (Team of 2)

Open-source C++20 2D engine for games with thousands of entities: data-oriented ECS with archetype and sparse-set backends benchmarked against each other, and an in-process MCP server so AI agents can inspect game state. OpenGL 3.3, CMake, Catch2, CI format checks.

Homeie November 2025 - Present · on hold
Founder & Lead Full Stack Engineer

Home-management app for shared living: chore tracking, shared expenses and automatic cost balancing. Spring Boot, Firebase, PostgreSQL, React Native (Expo); 2-person team.

TÜBİTAK – “Düşüncelerini Hafiflet!” March 2025 - March 2026
Research Software Developer

Gamified cognitive-bias-modification app for individuals with OCD, built with Dr. Sıla Derin for a TÜBİTAK-supported clinical psychology study. Unity 2022 with Firebase for anonymous data collection and export. Earned eligibility for a TÜBİTAK scholarship.

Other Projects 2026
Finance app: local-first iOS budgeting app, Expo SDK 57, Expo Router, SQLite + Drizzle ORM.
Mahrum: Node.js Discord bot with server logging, temporary voice rooms and a social-media feed.
Smart Parking: ESP32 parking system in C++ with ultrasonic sensors, a gate barrier and a state machine.

SKILLS

Languages	C#, Java, C++, TypeScript, JavaScript, SQL, Python
Backend	Spring Boot 3, Spring Security, JPA/Hibernate, REST, OpenAPI, Node.js, Firebase Auth
Frontend & Mobile	React, Next.js, React Native, Expo, Tailwind CSS, shadcn/ui, TanStack Query
Data	PostgreSQL, PostGIS, Supabase, Prisma, Drizzle, SQLite, schema design
DevOps	Docker, GitHub Actions, Nginx, Linux VPS, Vercel, Cloudflare Workers
Testing	JUnit, Jest, Vitest, Catch2, UI Automation
Desktop & Games	.NET / WPF, Unity 6, OpenGL
AI-driven SDLC	Claude Code, MCP servers, Nissth; used across software and game development
Tools	Git/GitHub, Linear, Jira, Miro

LANGUAGE

English - C1
Arabic - A2
Turkish - Native

LEADERSHIP & ACTIVITIES

DEU POG (Project And Game Development Community) 2025 May - 2026 July
Chairman
Led the university's project and game development community: team structure, strategy, game jams, workshops and collaborative software projects; represented the community externally.

Instagram: https://www.instagram.com/deupog
Website: www.deupog.com

Fiuby Gaming Club 2025 December - 2026 December
Chairman
Leading a nationwide gaming community that grew out of the startup Fiuby.com: strategy, event planning, member onboarding and scaling the member network.
